About SCMS

The Supply Chain Management System (SCMS) was established to enable an unprecedented scale-up of HIV/AIDS prevention, care and treatment programs in the developing world. SCMS procures and distributes essential medicines and health supplies, works to strengthen existing supply chains in the field, and facilitates collaboration and the exchange of information among key donors and other service providers. SCMS is an international team of 13 organizations funded by the US President's Emergency Plan for AIDS Relief (PEPFAR). The project is managed by the US Agency for International Development (USAID).

Introduction

Who We Are

Funded by the President's Emergency Plan for AIDS Relief (PEPFAR) and established in fiscal year 2005, SCMS (the Supply Chain Management System) is helping host nations increase their capacity for delivering essential lifesaving HIV/AIDS medicines and supplies to people in need of treatment and care.

Managed by the Partnership for Supply Chain Management ([PFSCM](#)), SCMS brings together 13 private sectors, nongovernmental and faith-based organizations that are among the most trusted names in supply chain management and international public health and development. With offices in 17 countries and over 400 dedicated staff members around the world, we are helping to improve the lives of people living with HIV/AIDS in some of the countries most severely impacted by the pandemic.

SCMS works in collaboration with host-country governments and local and global partners; procures essential medicines and supplies at affordable prices; helps strengthen and build reliable, secure and sustainable supply chain systems; and fosters coordination of key stakeholders. SCMS is a project contracted by the US Government through USAID primarily to provide supply chain services and support to programs within PEPFAR. We procure for US Government supported HIV/AIDS projects and similar projects funded by organizations such as the Global Fund for AIDS, TB and Malaria. More information about PEPFAR can be found at <http://www.pepfar.gov>.

How to use this catalog

Clearly specifying the products you need is key to ensuring that you receive the right products when you need them. Unclear specifications can lead to errors and delays in delivery.

This catalog provides a list of standardized products derived from current HIV/AIDS health needs as defined by our clients. Whenever possible, we recommend that you choose from products listed in this catalog when placing an order with SCMS. If you can't find what you're looking for in this catalog, please see the section below on "How to submit your inquiry to SCMS" and visit the ecatalog at <http://scms.pfscm.org/scms/ecatalog> for contact information.

Program lists

The program-specific section of the catalog provides lists of commonly used products for the following program areas: blood safety, early infant diagnosis (EID), food products (FP), prevention of mother-to-child transmission (PMTCT), male circumcision (MC), home based care kit (HBC) and Warehouse in a Box (WiB).

Product lists

The product section of the catalog is a subset of SCMS's entire product list and includes formulary lists of antiretroviral (ARV) products, HIV test kits, essential medicines including those used to treat opportunistic infections (OI), and laboratory equipment and supplies. We have developed these lists to assist you in identifying products that are available and meet the standards for a range of product needs for HIV/AIDS initiatives.

How to submit your inquiry to SCMS

Each item is assigned an SCMS item code. To speed your order and ensure that you receive the correct products, reference these codes when placing an order. This catalog is updated quarterly based on market trends and new product selections. Some products listed in previous versions of the catalog may not be listed in the current version. Please refer to the online catalog via the SCMS website at <http://scms.pfscm.org/scms/ecatalog> for the most current information on products.

If you work in a PEPFAR focus country and would like to order a product, contact your local SCMS representative (see countries and contacts at <http://scms.pfscm.org/scms/where>) or the Project Management Office in the US at +1 571-227-8600 or SCMSInfo@pfscm.org.

When contacting SCMS, the key questions we will ask include:

- Do you want to procure either a drug or a lab item?
- What are the products from this list you require?
- What are the quantities?
- Where do you want the products delivered?
- When do you require the products?
- Is funding available, and what is the source of such funding?
 - To speed the inquiry process, please download a **Price Request form** and **Client and Recipient Information form** from the e-catalog at <http://scms.pfscm.org/scms/ecatalog>
 - If you are interested in procuring a vehicle, please download the **Vehicle Questionnaire** from the e-catalog at <http://scms.pfscm.org/scms/ecatalog/other>

How to confirm our price quote

Once we receive your inquiry, one of our procurement specialists will contact the appropriate vendors with a request for quotation to find the best available prices. We will then prepare a price quote for your consideration based on your requirements. The price quote will be used to confirm product specifications and includes both the price and anticipated time needed for delivery once we place an order with the supplier(s). We charge our clients the cost of the commodity plus freight and delivery, in addition to a 5% surcharge or processing fee.

The entire process of receiving an inquiry and generating a price quotation usually takes between one to six weeks, depending on the type of commodity. Requests for products not listed in this catalog will require significantly more effort, resources and time (several weeks or even months) to identify a supplier and develop the appropriate information to place an order. We may split your initial request into two or more price quotes to speed delivery of products that are more readily available so that they are not delayed while we obtain products more difficult to procure.

- **If you approve the price quote(s), sign and return to SCMS.** We cannot confirm your delivery date until we have received the signed price quote.

Ordering from our suppliers

Once you have signed and returned a price quote, and confirmed funding, we will place the order on your behalf and provide the anticipated delivery date(s) for your order(s). We charge the cost of the commodity plus freight delivery and a 5% surcharge for processing the order. Commodities provided from a SCMS regional distribution center may have blended freight and commodity costs. In the spirit of transparency, from time to time we will report to our clients these service costs, including quality assurance surveillance, for your reference purposes only.

Please note that lead times for deliveries vary depending on the type of commodity, mode of shipment and clearance per country. Average lead times for our main commodity types are:

Product Type	Average delivery lead time (weeks)*
ARVs	3-23
Blood supplies	10-28
Laboratory items	2-20
OIs **	4-23
Test kits	6-15
Food Products	10-23

*Lead time based on air shipment. We recommend considering sea freight, which can be 80-90 percent more cost effective, but takes longer.

** Lead time depends on registration requirements and availability.

- **There's nothing for you to sign or do at this stage.** We, however, will keep you informed of progress and alert you to any delays.

Warranty and Maintenance Contracts

Both extended warranty and maintenance contracts are allowable under the SCMS program, subject to some restrictions. As extended warranties and maintenance agreements are different types of agreements, they are subject to different restrictions.

Warranty agreements are guaranties that come with the sale of a product and are usually for a period of one year after installation but can be procured at the time of purchase for multiple years at a favorable rate, if desired. In general, warranties cover spare parts and labor. PFSCM is not the title holder of the warranty as warranties are tied to the commodity purchased, not the purchaser. If something is wrong with the product in the future, it is up to the owner of the goods to invoke any warranty repair, not the SCMS program.

Maintenance contracts can be procured for coverage beyond the warranty period for SCMS purchased instruments (on a case-by-case basis for non-SCMS procured instruments with prior USAID approval). As Maintenance contracts are service agreements, they can only be valid in the fiscal year in which they are purchased. However, there can be option periods for future fiscal years, subject to future payment. All maintenance agreements are invalid past the point when the current SCMS task order (contract) comes to an end on September 26, 2013. Maintenance contracts should start at the date when the warranty ends and should cover spare parts and labor, preventive maintenance and repair of instruments.

Maintenance templates can be custom-tailored based on the type of product and the country needs. It is suggested that the contract should include at least one preventative visit and one repair per year (any necessary repair should be covered by the maintenance) with the option to pool across instruments and facilities. Preventative maintenance visits should be pre-scheduled, documented and set per site. Like warranty agreement, maintenance agreements are tied to the product, not the purchaser and thus it is the owner of the equipment to enforce the maintenance agreement. SCMS has developed a transferability clause in the maintenance contract template which will allow the contract to be transferred from SCMS to the client with the written agreement of the service provider.

Note: Maintenance contracts and agreements can only be valid for the fiscal year in which they were paid. Maintenance contracts (services) are subject to existing SCMS procurement processes

Shipping and Receiving your delivery

SCMS will then manage the order through to delivery to the agreed destination, arranging distribution of supplies either from one of our regional distribution centers in Ghana, Kenya or South Africa or by direct shipment from our supplier.

- To facilitate the order, please visit the e-catalog to download the **Shipping Instructions form** at <http://scms.pfscm.org/scms/ecatalog/other>

Once you receive the product, we ask you to accept delivery and then we will debit the cost to your account with SCMS. SCMS arranges settlement with the original supplier.

- To complete the process, **you must provide a proof of delivery to SCMS.**

Early Infant Diagnosis (EID) Products

This is a comprehensive list of equipment, supplies and consumables required for EID programs. This list was developed by the International Laboratory Branch of the US Centers for Disease Control and Prevention (CDC) in collaboration with SCMS. Although quite comprehensive, this list is by no means exhaustive. Additional products may be required, depending on the needs of the EID facility. As always, refer to the SCMS ID Number to help speed the processing of your order.

Male Circumcision (MC)

PEPFAR will be scaling up HIV/AIDS prevention in the next five years, and male circumcision (MC) will be a key prevention strategy. SCMS has participated in the PEPFAR MC technical working group's (TWG) efforts to standardize commodities for male circumcision, agreeing to three pre-made kits that programs can choose from. Having standardized kits available will reduce the cost of commodities and save time in selecting products. Items in the pre-made kits can not be substituted.

The MC TWG published a report that provides a wealth of information on the subject, lists all commodities contained in each kit as well as other commodities that are needed in theatres of operations. This report can be downloaded from the program section of the SCMS ecatalog (<http://scms.pfscm.org/scms/ecatalog>).

Please note that due to the complexity of this project, some aspects of MC logistics are still evolving. Please contact Sameer Sakallah, Senior Technical Laboratory Advisor, at (ssakallah@pfscm.org) if you have any questions about procuring MC products.

SCMS offers Reusable Kits and Disposable Kits:

- **Reusable kits:** SCMS provides two reusable kits: one for use with forceps guided MC procedure and one for sleeve or dorsal slit procedures. Each kit contains sufficient instruments and consumables necessary for one MC procedure. Programs interested in reusable kits should purchase additional consumable kits separately.
- **Disposable kits:** Each kit contains sufficient instruments and consumables for one MC procedure.

Currently, SCMS can take orders for the disposable MC kit with the first delivery estimated in late spring / early summer. Availability of reusable kits will follow shortly thereafter.

Essential items needed to perform an MC operation are listed after each kit description in this section. These must be procured individually and the quantities may be determined based on the number of patients expected for each site.

In addition, each MC site must have the components of the following supplemental modules (see p.21). Although the module items are listed together, they are not packaged together. Listed products can be purchased individually in the required quantity.

- Module 1 includes supplies needed for infection prevention & control
- Module 2 includes equipment for theatre of operation
- Module 3 includes emergency medical management supplies

Due to the scale of MC programs it will be essential to include medical waste management measures. It is the responsibility of each country with a MC program to plan for and implement waste management protocols. SCMS is in the process of identifying products to support medical waste management but at this time does not provide such products as part of the MC program core list.

MC KIT OPTION 1: Reusable Kit for Forceps Guided Procedure

This kit is packaged in two components: Instrument pack (Table 3) and Consumables pack (Table 4). Additional essential commodities, including pharmaceutical products, are listed in Table 5. The kit is wrapped in surgical crepe paper and is ethylene oxide (ETO)-sterilized in a 0.3µ sterilization indicator bag. Expiration date is indicated on the sterilization bag.

Home Based Care Kit (HBC Kit)

The home based care kit (HBC kit) is composed of various products to provide supplies to the home based workers for the care of people living with HIV/AIDS and for their own protection. An HBC kit contains usually essential products such as painkillers, gloves and bandages. We can offer a standardized kit through our approved vendors, or we can work together to customize the kits to your desire. Note that SCMS will determine if the pharmaceutical product on this list meets the regulatory and/or importation requirements of the country of importation/consumption. Please feel free to contact us for more information.

Specialized Food Products

The specialized food product list supports requests for commodities required in food-by-prescription programs. The list currently includes ready-to-use therapeutic foods (RUTF) and fortified blended flour (FBF). In addition to these specialized food products, food-by-prescription programs may require non-food products such as mid- and upper-arm circumference (MUAC) tapes, infant scales (Salter scales, 25 kg), weighing pants, adult scales (not bathroom scales), height boards/meters, weight-for-height/BMI tables and water purification commodities. A few of these items are listed. If you have other product requirements in this area, please contact us for immediate assistance. As always, refer to the SCMS ID Number to help speed the processing of your order.

Warehouse in a Box

Warehouse-In-A-Box (WiB) provides an insulated warehouse that can be shipped to any location for rapid assembly which incorporates offices and ablutions facilities, and furnishings. WiB has a modular design rapid that allows deployment and ready scalability, with an estimated order to completion timeframe of six to nine months. In addition, the product includes job descriptions, operating procedures and training matrices for personnel; in country operational and management skills training and transfer, and two monthly follow up audits and refresher training.

For purposes of illustration the firm fixed price of \$566000 (excluding shipping) is for a 500 sq meter size and therefore shows a "cost per size" relevance. Most facilities will be designed to suit specific needs and the scalability allows growth plans and modular expansion to suit most requirements. The projection of the number of pallet locations required is the primary definition of the size.

If a stand alone pre-fabricated warehouse is required or if you need more details on how to implement WiB, please contact SCMS for details at +1 571-227-8600 or SCMSInfo@pfscm.org.

This solution:

- Provides an insulated warehouse that can be shipped to any location for rapid assembly;
- Is quickly and simply customized to meet individual site layout requirements;
- Incorporates offices and ablutions facilities and furnishings;
- Provides standard equipment and fittings as part of the installation;
- Has a modular design that allows rapid scalability against increasing demand;
- Is simply procured as a “one stop” solution, with SCMS managing all service suppliers;
- Provides job descriptions, Standard Operating Procedures (“SOPs”) and training matrices for warehouse personnel;
- Includes in country operational and management skills training and transfer;
- Is rapidly deployed with an estimated order to sign-off lead time of six months; and
- Promotes sustainability with training and follow up audits – the training program is designed for 6-8 people and includes two audits post implementation.

Configuration

WiB is deployed in 20 X 25 m modules (500m²), with the ability to expand to six conjoined modules totalling 3,000m². It is installed on flat land of acceptable compaction. The recipient is responsible for any preparation of and access to the land and the provision of electricity, water and sewerage to the site. The title is transferred on completion of installation.

Pricing and Cost Comparison

WiB will be supplied as a Firm Fixed Price (FFP) commodity, quoted FOB Johannesburg. The FFP will be finalised based on the individual requirements of the site which are simply and quickly evaluated during the order process.

Payment against major milestones in the project: (Based on a 500m² warehouse)

1. In-country civil works and casting of concrete base and floor:

Payment to contractors may require a deposit and final payment after completion in approximately 30 days. This component is approximately 16% of total costs of entire installation. Est. \$74148USD

2. Steel frame and insulated cladding for warehouse and offices:

Deposit and partial payment are due before the goods leave the factory and are placed on the ship or vehicle. Payment is made in two parts:

- Part 1 payment is for the purchase of the steel frame and cladding
- Part 2 payment is for the installation of the WiB, the cost of which is partially paid at the commencement of civil works. This component is approximately 28 % of total costs of installation. Est.: \$135082USD.

Kitting and equipment for warehouse. (Air conditioning, racking, Generator, UPS, MIS forklift, etc): This component is approximately 28 % of cost of installation and many items require deposits or full payments before delivery. Est.: \$146084 USD. Please note that while these options may vary per order, clients are not required to purchase certain options because they may already have the equipment and instead may upgrade certain configurations. However, the ceiling price (\$566000USD) of the entire installation may not be exceeded.

3. Training and commissioning:

This is a 1-3 months process and will be completed once all equipment is installed, tested and commissioned. Training will be delivered per the full program. The hand over will take place once all training has been delivered and the operation has been commissioned. This component is approximately 28% of the cost. Est.: \$209808USD.

Total Cost Excluding Shipping Est.: \$566000USD

NOTE: Transport-Freighting costs will be provided at the time of the quotation based on the mode of transport, distance from the manufacturer and weight of final product.

Medicines (including ARVs, medicines for opportunistic infections, sexually transmitted infections, TB and malaria)

Antiretroviral medicines (ARVs)

We can supply all ARVs that are approved or tentatively approved by the US Food and Drug Administration (FDA). The products listed in this catalog form our core products. Branded items can be recognized by the brand name in square brackets, the other items are generic products

Prices for the generic ARVs are based on contracts between PSCM and the suppliers; prices for the innovator products are in general available at the Accelerated Access Initiative (AAI) level for low or middle income countries. The prices may differ for clients who are not based in countries qualifying for AAI pricing. Contact an SCMS buyer for pricing. For a most current list of ARVs procured by SCMS, please visit the ARV section of the e-catalog: <http://scms.pfscm.org/scms/ecatalog/arvs>

The manufacturing sites of these FDA-approved ARVs are also specifically inspected for Good Manufacturing Practices (GMP) by the FDA to meet quality standards. The sites may or may not be within the US.

Please visit the FDA website - <http://www.accessdata.fda.gov/Scripts/cder/DrugsatFDA> for more specific FDA registration information. FDA also lists these ARVs in association with PEPFAR. This list is constantly updated and the latest version can be found on:

Essential Medicines

The core list of essential medicines is based on common opportunistic infections and requests from other HIV/AIDS care and treatment programs.

SCMS supplies drugs that meet quality standards for GMP and safety requirements, and that are efficacious. An approved process by USAID is required before SCMS can purchase using US Government funds.

The medicines listed in the catalog are not registered in all (PEPFAR focus) countries. Identifying a vendor will require time to take into account local registration and importation requirements. We will try to obtain the product which is both compliant with our quality requirements as well as with your country's importation requirements.

If a drug you need is not listed, please contact us regarding your requirements and indicate the registration/importation requirements as well as the registered options. We will do our utmost to make these products available to you. The lead time depends on registration/importation requirements and availability.

We would like to refer you to the GDF project under PFSCM (<http://www.pfscm.org/pfscm>) for large orders of TB medicines and to PMI (<http://www.pmi.gov/index.html>) for large orders of ACT medicines. SCMS is only in the position to supply small quantities of these products.

102225	Co-trimoxazole 240mg/5ml, oral suspension, bottle of 100ml
102078	Co-trimoxazole 480mg, tablets, 1000 tablets
102079	Co-trimoxazole 480mg, tablets, 1000 tablets (100x10 blister)
103543	Co-trimoxazole 480mg/5ml injection, 10 ampoules
102515	Co-trimoxazole 960mg, tablets, 1000 tablets
102080	Co-trimoxazole 960mg, tablets, 500 tablets
102329	Co-trimoxazole 960mg, tablets, 100 tablets (10x10 blister)
106002	Co-trimoxazole 960mg, tablets, 1000 tablets (100x10 blister)
103380	Dapsone 100mg, tablets, 28 tablets
106128	Dapsone 50mg, tablets, 1000 tablets
102082	Doxycycline 100mg (as hyclate), capsules, 1000 capsules (100x10 blister)
106688	Erythromycin 125mg/5ml (as ethyl succinate), powder for oral suspension, 100ml, 1 bottle
106739	Erythromycin 125mg/5ml (as ethyl succinate), powder for oral suspension, 100ml, 250 bottles
102083	Erythromycin 250mg (as stearate), tablets, 1000 tablets
106225	Erythromycin 500mg (as stearate), tablets, 100 tablets (10x10 blister)
103943	Fluconazole 200mg, capsules, 100 capsules (10x10 blister)
102088	Fluconazole 50mg, capsules, 100 capsules
106132	Ganciclovir 500mg, powder for injection, 1 vial

103382	Gentamicin 80mg/2ml, injection, 100 ampoules
102981	Gentian Violet, 4 x 25g, powder for solution
104597	Hydrocortisone acetate 1%, cream, 10 tubes of 15g
103540	Ibuprofen 200mg, tablets (film coated), 1000 tablets
103544	Ibuprofen 400mg, tablets (film coated), 500 tablets
102150	Loperamide 2mg (as hydrochloride), tablets, 1000 tablets
102091	Miconazole 10mg, muco-adhesive buccal tablets, 350 tablets (50x7 blister)
103545	Miconazole 2%, cream, 10 tubes of 30g
104599	Morphine sulphate 10mg/ml, 10 ampoules (nt)
106016	Multivitamin + minerals, tablets, 100 tablets
103547	Multivitamin coated, tablets, 1000 tablets
102093	Nystatin 100.000IU oral, non-coated tablets, 100 tablets
106723	Nystatin 100.000IU vaginal tablets, 100 tablets
102983	Oral Rehydration Salt 20.5g/1 liter (low osm), powder for solution, 100 sachets
104010	Paracetamol 120mg/5ml, oral solution, bottle of 100 ml
102153	Paracetamol 500mg, tablets, 1000 tablets
104593	Sodium Stibogluconate 33% injection, 1 vial x 30ml
106221	Water for Injection, injection, 50 ampoules x 5ml
	Antimalarials - ACTs (Artemisinin Combination Therapy)
107332	Artesunate/Amodiaquine 50/153mg, tablets, 3 tablets (blister)
107333	Artesunate/Amodiaquine 50/153mg, tablets, 6 tablets (blister)
107334	Artesunate/Amodiaquine 50/153mg, tablets, 12 tablets (blister)
102116	Artesunate+Amodiaquine 50+153mg, tablets, 3+3 tablets (co-blister)
102117	Artesunate+Amodiaquine 50+153mg, tablets, 6+6 tablets (co-blister)
102118	Artesunate+Amodiaquine 50+153mg, tablets, 12+12 tablets (co-blister)
107357	Artesunate/Amodiaquine 25mg/67.5mg, tablets, 3 tablets (x25 blisters)
107358	Artesunate/Amodiaquine 50mg/135mg, tablets, 3 tablets (x25 blisters)
107359	Artesunate/Amodiaquine 100mg/270mg, tablets, 3 tablets (x25 blisters)
107360	Artesunate/Amodiaquine 100mg/270mg, tablets, 6 tablets (x25 blisters)
107352	Artesunate+Sulfadoxine/Pyrimethamine 50mg+500mg/25mg, tablets, 6+2 tablets (co-blister)
107353	Artesunate+Sulfadoxine/Pyrimethamine 100mg+500mg/25mg, tablets, 6+3 tablets (co-blister)
107207	Artemether/Lumefantrine 20mg/120mg [Coartem], dispersible tablets, 6x1 tablets (x30 blisters)
107208	Artemether/Lumefantrine 20mg/120mg [Coartem], dispersible tablets, 6x2 tablets (x30 blisters)
107335	Artemether/Lumefantrine 20mg/120mg [Coartem], dispersible tablets, 6x3 tablets (x30 blisters)
107344	Artemether/Lumefantrine 20mg/120mg [Coartem], scored tablets, 6x1 tablets (x30 blisters)
107345	Artemether/Lumefantrine 20mg/120mg [Coartem], scored tablets, 6x2 tablets (x30 blisters)
105517	Artemether/Lumefantrine 20mg/120mg [Coartem], scored tablets, 6x3 tablets (x30 blisters)

106924	Artemether/Lumefantrine 20mg/120mg [Coartem], scored tablets, 6x4 tablets (x30 blisters)
106925	Artemether/Lumefantrine 20mg/120mg, scored tablets, 6x1 tablets (blister)
106926	Artemether/Lumefantrine 20mg/120mg, scored tablets, 6x2 tablets (blister)
106927	Artemether/Lumefantrine 20mg/120mg, scored tablets, 6x3 tablets (blister)
106928	Artemether/Lumefantrine 20mg/120mg, scored tablets, 6x4 tablets (blister)
	1st line TB medicines
107368	Ethambutol 100mg, tablets, 1000 tablets
102134	Ethambutol 400mg, tablets, 1000 tablets
106831	Ethambutol 400mg, tablets, 672 tablets (24x28 blister)
107370	Isoniazid elixer 50mg/5ml, 500ml
102136	Isoniazid 100mg, tablets, 1000 tablets
102137	Isoniazid 300mg, tablets, 1000 tablets
106832	Isoniazid 300mg, tablets, 672 tablets (24x28 blister)
102138	Pyrazinamide 400mg, tablets, 1000 tablets
106833	Pyrazinamide 400mg, tablets, 672 tablets (24x28 blister)
107369	Rifabutin 150mg, capsules, 30 capsules (blister)
102143	Streptomycin (as sulfate), powder for injection, 1g x 50 vials
102135	Ethambutol/Isoniazid 400mg/150mg, tablets, 1000 tablets
106834	Ethambutol/Isoniazid 400mg/150mg, tablets, 672 tablets (24x28 blister)
102140	Rifampicin/Isoniazid 150mg/75mg, tablets, 1000 tablets
106835	Rifampicin/Isoniazid 150mg/75mg, tablets, 672 tablets (24x28 blister)
106836	Rifampicin/Isoniazid 150mg/150mg, tablets, 1000 tablets
107371	Rifampicin/Isoniazid 300mg/150mg, tablets, 1000 tablets
107372	Rifampicin/Isoniazid 60mg/30mg, dispersible tablets, 1000 tablets
107373	Rifampicin/Isoniazid 60mg/60mg, dispersible tablets, 30 tablets (blister)
106840	Rifampicin/Isoniazid/Ethambutol 150mg/75mg/275mg, tablets, 672 tablets (24x28 blister)
106841	Rifampicin/Isoniazid/Ethambutol 150mg/75mg/275mg, tablets, 1000 tablets
107374	Rifampicin/Isoniazid/Pyrazinamide 60mg/30mg/150mg, dispersible tablets, 1000 tablets
107375	Rifampicin/Isoniazid/Pyrazinamide 150mg/75mg/400mg, tablets, 1000 tablets
106839	Rifampicin/Isoniazid/Pyrazinamide/Ethambutol 150mg/75mg/400mg/275mg, tablets, 672 tablets (24x28 blister)

Please note, powders for injection are supplied without water for injection, which should be ordered separately if needed

HIV Test Kits

This list includes the most frequently used HIV test kits. If you require a test kit that is not shown, we may be able to supply it, but we will need to seek confirmation of efficacy and suitability from the CDC and USAID. Please contact us regarding your test kit requirements. For a most current list of HIV test kits procured by SCMS, please visit the HIV Test Kit section of the e-catalog at http://scms.pfscm.org/scms/ecatalog/test_kits.

Table 20. HIV Test Kit Core Product List

SCMS ID Number	Description
102604	Bioline HIV 1/2 3.0 Kit, 25 Tests
103927	Bundi Rapid HIV-1/2 Kit, 25 Tests
104805	Cambridge Biotech HIV-1 Western Blot Kit, 27 Tests
103167	Clearview Complete HIV 1/2 Kit, 25 Tests
102169	Determine HIV-1/2 Complete Kit, 100 Tests
105385	DoubleCheck Gold HIV 1&2 Kit, 100 Tests
102183	DoubleCheck HIV 1&2 Kit, 40 Tests
105740	Enzygnost Anti-HIV 1/2 Plus Kit, 192 Tests
102208	Enzygnost Anti-HIV 1/2 Plus Kit, 960 Tests
105741	Enzygnost HIV Integral II Kit, 192 Tests
104802	Enzygnost HIV Integral II Kit, 960 Tests
102184	First Response HIV 1-2-O, v.3.0, Cards, Kit, 30 Tests
102167	Genie II HIV-1/HIV-2 Kit, 40 Tests
107122	Genie III HIV-1/HIV-2 Kit, 40 Tests
106727	INNO-LIA HIV I/II Score Kit, 20 Tests
102956	Murex HIV 1.2.0 Kit, 480 Tests
104872	Murex HIV 1.2.0 Kit, 96 Tests
102960	Murex HIV AG/AB Combination Kit, 480 Tests
104875	Murex HTLV-I+II Kit, 96 Tests
102953	New LAV Blot 1 HIV Kit, 18 Tests
102954	New LAV Blot 2 HIV Kit, 18 Tests
102179	OraQuick Rapid HIV-1/2 Antibody Kit, 100 Tests
102185	Precise HIV Kit, 30 Tests
106673	Stat-Pak HIV 1 / 2 Dipstick Assay Kit, 30 Tests
102170	Stat-Pak HIV 1 / 2 Kit, 20 Tests
102165	Uni-Gold HIV Kit, 20 Tests
106295	Vironostika HIV 1 Ag Kit, 192 Tests
102959	Vironostika HIV Uni-Form II 1+2+0 Kit, 192 Tests

Laboratory equipment and supplies

This list of laboratory items includes the most commonly used items for HIV/AIDS programs. The range and type of laboratory equipment, reagents and consumables required in any laboratory operation is extensive. We can procure other items to meet your needs, but special orders usually have a longer lead time. Note that larger equipment like refrigerators will also have longer lead times than products that weigh less. For a current list of laboratory products and supplies procured by SCMS, please visit the Laboratory Equipment and Supplies section of the e-catalog at <http://scms.pfscm.org/scms/ecatalog/lab>

SCMS ID Number	Description
	<i>Analyzer Sub Group</i>
103580	Biochemistry, ABX Diffrol Twin Pack 2 Normal x 3mL
103582	Biochemistry, ABX Minotrol 16, Normal, Twin Pack, 2 x 2.5mL
102784	Biochemistry, ABX Pentra 400 Clinical Chemistry Analyzer Cups, White, 1000 Pcs
106572	Biochemistry, ABX Pentra 400, Amylase CP Cassette, 125 Tests
106401	Biochemistry, ABX Pentra, Albumin CP
106389	Biochemistry, ABX Pentra, ALP CP, 1 x 33mL
106390	Biochemistry, ABX Pentra, ALT CP, 1 x 70mL
106391	Biochemistry, ABX Pentra, AST CP, 1 x 70mL
106685	Biochemistry, ABX Pentra, Basolyse II, 1L
106394	Biochemistry, ABX Pentra, Calcium CP, 1 x 83mL
106414	Biochemistry, ABX Pentra, Chloride Electrode, Each
106395	Biochemistry, ABX Pentra, Cholesterol CP, 1 x 90mL
106407	Biochemistry, ABX Pentra, Clean-Chem CP, 1 x 30mL
104919	Biochemistry, ABX Pentra, Cleaner, 1L
106405	Biochemistry, ABX Pentra, Creatinine CP, 1 x 27mL
106417	Biochemistry, ABX Pentra, Cuvette Segments Rack, 450 Pcs
106406	Biochemistry, ABX Pentra, Deproteinizer CP, 1 x 30mL
106846	Biochemistry, ABX Pentra, Detergent, LDL, Direct CP, Cassette, 100 Tests
103581	Biochemistry, ABX Pentra, Diffrol Twin Pack 1L, 1H, 6mL
102344	Biochemistry, ABX Pentra, Diluent, 20L
106396	Biochemistry, ABX Pentra, Direct Bilirubin CP, 1 x 31mL
106412	Biochemistry, ABX Pentra, Etching CP, 1 x 25mL
106392	Biochemistry, ABX Pentra, GGT CP, 1 x 70mL
106402	Biochemistry, ABX Pentra, Glucose PAP CP, 1 x 90mL

106393	Biochemistry, ABX Pentra, Lipase CP, 1 x 31mL
103610	Biochemistry, ABX Pentra, Minotrol 16, Twin Pack, 1L 1H
106386	Biochemistry, ABX Pentra, MultiCal, 10 x 3mL
106387	Biochemistry, ABX Pentra, N Control, 10 x 3mL
106388	Biochemistry, ABX Pentra, P Control, 10 x 5mL
106415	Biochemistry, ABX Pentra, Potassium Electrode, Each
106408	Biochemistry, ABX Pentra, Qualitest Solution, 1 x 30mL
106886	Biochemistry, ABX Pentra, Reagent Cup, 10mL, 100 Pcs
106885	Biochemistry, ABX Pentra, Reagent Cup, 4mL, 100 Pcs
106416	Biochemistry, ABX Pentra, Reference Electrode, Each
106411	Biochemistry, ABX Pentra, Reference, 1 x 100mL
106397	Biochemistry, ABX Pentra, ron CP, 1 x 80mL
106413	Biochemistry, ABX Pentra, Sodium Electrode, Each
106409	Biochemistry, ABX Pentra, Standard 1, 1 x 280mL
106410	Biochemistry, ABX Pentra, Standard 2, 1 x 100mL
106398	Biochemistry, ABX Pentra, Total Bilirubin CP, 1 x 58mL
106404	Biochemistry, ABX Pentra, Total Protein CP, 1 x 28mL
106399	Biochemistry, ABX Pentra, Triglycerides CP, 1 x 90mL
106400	Biochemistry, ABX Pentra, Urea CP, 1 x 75mL
106403	Biochemistry, ABX Pentra, Uric Acid CP, 1 x 75mL
102340	Biochemistry, ABX, Eosinofix, 1L
103583	Biochemistry, ABX, Micros, Miniclean, 1L
103685	Biochemistry, AMS Type Liasys, Bulb
103318	Biochemistry, AMS Type Liasys, Calibrant, 5 x 5mL
103319	Biochemistry, AMS Type Liasys, Cleaner, 200mL
103317	Biochemistry, AMS Type Liasys, Control Serum II, 5 x 5mL
103316	Biochemistry, AMS Type Liasys, Control Serum, 5 x 5mL
103312	Biochemistry, AMS Type Liasys, Creatinine, 4 x 50mL
103313	Biochemistry, AMS Type Liasys, Glucose, 1 x 200mL
103314	Biochemistry, AMS Type Liasys, GOT/AST, 1 x 200mL
103315	Biochemistry, AMS Type Liasys, GPT/ALT, 1 x 200mL
103686	Biochemistry, AMS Type Liasys, Needle
103321	Biochemistry, AMS Type Liasys, Rinse Solution, 100mL
106543	Biochemistry, AMS, Probe Cleaning Filter, 25 Pcs
106548	Biochemistry, AMS, Rack for Reaction Cells, 100 Pcs
106547	Biochemistry, AMS, Reagent Container, 36 Pcs
106545	Biochemistry, AMS, Sample Cups, 0.8mL, 1000 Pcs

106542	Biochemistry, AMS, Wash Solution 8 x 10mL
102277	Biochemistry, BioSystems, Fully, (BSI) Automatic Clinical Chemistry Analyzer, With Spare Parts and Accessories, 220V-50Hz,
106661	Biochemistry, BioSystems, Fully, Amylase, 6 x 25mL
104429	Biochemistry, BioSystems, Fully, Automated punch system
104913	Biochemistry, BioSystems, Fully, Bulb
103307	Biochemistry, BioSystems, Fully, Calibrator Kit, 5 x 5mL
103310	Biochemistry, BioSystems, Fully, Cleaner, 500mL
104895	Biochemistry, BioSystems, Fully, Control Serum Level I Kit, 5 x 5mL
103306	Biochemistry, BioSystems, Fully, Control Serum Level II Kit, 5 x 5mL
103305	Biochemistry, BioSystems, Fully, Creatinine Kit, 4 x 50mL
103308	Biochemistry, BioSystems, Fully, Cuvettes, 50 Cuvettes
103304	Biochemistry, BioSystems, Fully, Glucose Kit, 1 x 200mL
103302	Biochemistry, BioSystems, Fully, GOT/AST, 1 x 200mL
103303	Biochemistry, BioSystems, Fully, GPT/ALT, 1 x 200mL
103311	Biochemistry, BioSystems, Fully, Printer Paper
103309	Biochemistry, BioSystems, Fully, Sample Cups, 1000 Cups
102401	Biochemistry, Calibrator f.a.s., 12 Vials x 3mL
104261	Biochemistry, COBAS, Bilirubin Direct, 500 Tests
104262	Biochemistry, COBAS, Bilirubin Total, 500 Tests
105796	Biochemistry, COBAS, C111, Activator
105003	Biochemistry, COBAS, C111, Alanine Aminotransferase, ALT/GPT, 400 Tests
106584	Biochemistry, COBAS, C111, Amylase, 400 Tests
105004	Biochemistry, COBAS, C111, Aspartate Aminotransferase, AST/GOT, 400 Tests
104994	Biochemistry, COBAS, C111, Biochemistry automated system, Each
105014	Biochemistry, COBAS, C111, Cleaning Solution, 1L
107204	Biochemistry, COBAS, C111, Creatinine Jaffe (comp.) 400 Tests
105015	Biochemistry, COBAS, C111, Electrolyte Activator 9 x 12mL
105006	Biochemistry, COBAS, C111, Glucose HK liquid 4 x 100 Tests
104359	Biochemistry, COBAS, C111, Halogen Lamp Bulb, Each
106587	Biochemistry, COBAS, C111, HDL Cholesterol +, 400 Tests
105010	Biochemistry, COBAS, C111, Hitachi sample cups, 500 Cups
105804	Biochemistry, COBAS, C111, ISE Calib. Ind./Urine
105806	Biochemistry, COBAS, C111, ISE Calibration Kit
105803	Biochemistry, COBAS, C111, ISE Chloride Electrode
105807	Biochemistry, COBAS, C111, ISE Etcher
105802	Biochemistry, COBAS, C111, ISE Potassium Electrode

105800	Biochemistry, COBAS, C111, ISE Reference Electrode
105805	Biochemistry, COBAS, C111, ISE Reference Solution
105801	Biochemistry, COBAS, C111, ISE Sodium Electrode
105017	Biochemistry, COBAS, C111, Microcuvettes, 1680 Pcs
105794	Biochemistry, COBAS, C111, NaCL, 9%
105008	Biochemistry, COBAS, C111, Precinorm U Plus 10 x 3mL
105009	Biochemistry, COBAS, C111, Precipath U Plus 10 X 3mL
105011	Biochemistry, COBAS, C111, Sample Micro Cups 500 Cups
105022	Biochemistry, COBAS, C111, Sample Probe, Each
105013	Biochemistry, COBAS, C111, Thermal printer paper 112mm, 5 Rolls
105799	Biochemistry, COBAS, C111, Triglyceride GPO-PAP, 200 Tests
104287	Biochemistry, COBAS, Control cups, brown, 1000 Cups
105000	Biochemistry, COBAS, Integra 400, Probe set
103291	Biochemistry, COBAS, Integra, ALT/GPT, 500 Tests
106039	Biochemistry, COBAS, Integra, Amylase, 300 Tests
104878	Biochemistry, COBAS, Integra, ASTL, 500 Tests
106040	Biochemistry, COBAS, Integra, Bicarb CO2, Cassette, 250 Tests
105352	Biochemistry, COBAS, Integra, Bilirubin Direct, 350 Tests
106892	Biochemistry, COBAS, Integra, Bilirubin TS Cassette/350
105795	Biochemistry, COBAS, Integra, Check Solution (orange sol)
104880	Biochemistry, COBAS, Integra, Cholesterol, 400 Tests
102393	Biochemistry, COBAS, Integra, Clean Solution, 1L
106043	Biochemistry, COBAS, Integra, Control Abnormal for Ammonia, Ethanol, CO3, 5 x 4mL
106042	Biochemistry, COBAS, Integra, Control Normal for Ammonia, Ethanol, CO2, 5 x 4mL
102388	Biochemistry, COBAS, Integra, Creatinine Jaffe, 700 Tests
104881	Biochemistry, COBAS, Integra, Creatinine, 700 Tests
104995	Biochemistry, COBAS, Integra, Cuvette Waste Container, 20 Pcs
104883	Biochemistry, COBAS, Integra, Glucose, 800 Tests
102394	Biochemistry, COBAS, Integra, Halogen Lamp, 12V/20W Assy
106583	Biochemistry, COBAS, Integra, HDL Cholesterol, 200 Tests
102454	Biochemistry, COBAS, Integra, ISE Calibrator Indirect, 250mL
104882	Biochemistry, COBAS, Integra, ISE Deproteinizer, 6 x 21mL
104999	Biochemistry, COBAS, Integra, ISE Deproteinizer, 6 x 23mL
106917	Biochemistry, COBAS, Integra, ISE Reference Electrolyte, 250mL
106036	Biochemistry, COBAS, Integra, ISE Sol 1
106037	Biochemistry, COBAS, Integra, ISE Sol 2
106044	Biochemistry, COBAS, Integra, NH3/CO2/Ethanol Cal, 2 x 4mL

106041	Biochemistry, COBAS, Integra, Phosphate, 250 Tests
106916	Biochemistry, COBAS, Integra, Potassium Electrode K
102391	Biochemistry, COBAS, Integra, Precinorm U, 4 x 5mL
104885	Biochemistry, COBAS, Integra, Precipath U, 4 x 5mL
104165	Biochemistry, COBAS, Integra, Reaction Cuvettes, 20000 Pcs
104996	Biochemistry, COBAS, Integra, Sample Cups, 1000 Cups
106915	Biochemistry, COBAS, Integra, Sodium Electrode Na
104886	Biochemistry, COBAS, Integra, Triglycerides, 250 Tests
104888	Biochemistry, COBAS, Integra, Urea, 500 Tests
102919	Biochemistry, COBAS, Integra, Waste Container, 20 Pcs
102398	Biochemistry, Hitachi 902, ALT/GPT IFCC Sys 1, 12 x 50mL
106593	Biochemistry, Hitachi 902, Amylase, 12 x 22mL/6 x 10mL

Frequently asked questions - Procuring commodities through SCMS

Products

Q. What kinds of products can I procure from SCMS?

A. SCMS can procure most products needed for a comprehensive HIV/AIDS care and treatment program, including:

- antiretroviral medicines
- HIV test kits
- laboratory supplies and equipment
- drugs to treat opportunistic infections, such as tuberculosis and malaria
- drugs and supplies for palliative and home-based care
- products for food-by-prescription programs, such as: ready-to-use therapeutic food (RUTF) and fortified blended food (FBF)

Visit our e-catalog at <http://scms.pfscm.org/scms/ecatalog> for a standardized list of regularly procured products.

Q. Can you only supply goods produced in the United States?

A. No. SCMS buys medicines and goods that meet quality standards for Good Manufacturing Practices (GMP), safety requirements, and that are efficacious. SCMS buys high-quality products from reliable manufacturers in many countries to meet the needs of HIV/AIDS programs. The sites may or may not be within the US. Please see specific commodity type information for more details.

Q. What are specific issues related to ordering ARVs that I should be aware of?

A. We can supply any branded or generic ARVs that are approved or tentatively approved by the FDA. The manufacturing sites of these FDA-approved ARVs are also specifically inspected for GMP by the FDA to meet quality standards. The sites may or may not be within the US. As with all pharmaceuticals, the ARVs requested must also be registered for use with the drug regulatory authority of the destination country, or they must be waived for importation. Due to increasing demand for ARVs, manufacturers are reaching their maximum production capacity. Supplies are not always immediately available, and clients should expect longer lead times for large orders. For more specific FDA registration information and FDA lists of ARVs in association with PEPFAR, please visit <http://www.fda.gov/oia/pepfar.htm>.

Q. What are specific issues related to ordering test kits?

A. The list of HIV test kits in our e-catalog includes those most frequently used in PEPFAR countries. If you require a test kit that is not shown, we may be able to supply it, but we will need to seek confirmation of efficacy and suitability from the US Centers for Disease Control and Prevention (CDC) and the US Agency for International Development (USAID). Due to increasing demand, test kit manufacturers are reaching their maximum production capacity. Supplies are not always immediately available, so clients should expect a lead time of up to 14 weeks for large orders. Many test kits have a relatively short shelf-life. With a shelf-life of less than 12 months it is important to have staged delivery to obtain the maximum useable life. SCMS can advise on appropriate delivery patterns.

Q. What are specific issues related to medicines for opportunistic infections?

A. We supply essential drugs that meet the standards for GMP, safety requirements, and that are efficacious. An approval process by USAID is required before SCMS can purchase using U.S. Government funds. If drugs must be registered for use in the country of destination, it can lead to a complex procurement process, as relatively few of the drugs used to treat opportunistic infections registered for use in developing countries are registered with the FDA or an equivalent stringent regulatory authority. We can fulfill your demand better if there is the option to obtain an importation waiver. The potential number of essential drugs that may be required is extensive. If a drug you need is not listed in our e-catalog, please contact us regarding your requirements.

Q. What are specific issues related to laboratory supplies and equipment?

A. The range and type of laboratory equipment, reagents and consumables that may be required in any laboratory is extensive. The SCMS e-catalog contains products that we regularly supply to our clients. Because needs vary widely and must take into account local service capability, training and other issues, we work with each client to prepare a specific response to meet their individual requirements and fulfill any particular requirements of the funding agency.

The time needed to deliver laboratory items can vary greatly depending on the type of commodity, location of the manufacturer or supplier, and availability of stock. Speak with your SCMS representative to learn more about specific turn-around times.

Q. When ordering particular products, what types of information will I need to provide?

A. SCMS needs to know the precise specification of the product(s) you require: its intended usage, (if this is not obvious from the specification), manufacturer name, manufacturer catalog number or SCMS e-catalog item number, and the requested delivery date by which the product is required. Contact us at SCMSInfo@pfscm.org regarding your product request. An SCMS representative will contact you to discuss your requirements in more detail to fully understand your needs and design the appropriate response.

Although we always strive to procure commodities for our clients as quickly as possible, the time needed to prepare a price quote and subsequently procure infrequently ordered commodities can be significant.

Procuring through SCMS

Q. How does the process work?

A.

- SCMS is a project contracted by the US Government through the USAID primarily to provide supply chain services and support to programs within the President's Emergency Fund for AIDS Relief (PEPFAR). If you are a program within PEPFAR that would like to procure products through SCMS, contact us to confirm that we are able to supply to your program. This may be done in person, by phone or email (SCMSInfo@pfscm.org). If you work in a PEPFAR focus country, contact your local SCMS representative (see countries and contacts at <http://scms.pfscm.org/scms/where>) or the Project Management Office in the US at +1 571-227-8600 or SCMSInfo@pfscm.org.
- We will need to know your requirements including when you require the product(s), where the product(s) should be delivered, product specifications, quantity and who has the authority to make financial commitments for your program.
- On the basis of your requirements, SCMS will prepare a price quote for your consideration. The price quote will be used to confirm product specifications and will include both the price and anticipated time needed from delivery once we place an order. You will usually have up to 30 days to review and reject or accept the price quote. If this price quote is acceptable, you will sign and return the price quote, and we will then place the order on your behalf and provide you the anticipated delivery date(s) for your order(s).
- SCMS will then manage the order through to delivery to the agreed destination, arranging supply either from one of our regional distribution centers in Ghana, Kenya or South Africa or by direct shipment from our supplier.
- Once the product is received, we ask you to accept delivery and then we will debit the cost to your account with SCMS. SCMS arranges settlement with the original supplier.

For regular repeat requirements, such as ARVs, test kits, reagents and other drugs, SCMS prefers to work on the basis of a quantified need, incorporating long term forecasts and supply plans for regular deliveries. This process will require detailed discussion and analysis between you and SCMS.

Q. How long does the typical order take to deliver once the order is placed?

A. Delivery periods vary extensively depending on the product ordered, size of the order, availability of stock and manufacturers' production schedules. Delivery can take as little as three weeks if the appropriate product is available from local stock (at SCMS RDC or local vendor), to as much as 20+ weeks for specially manufactured equipment or specialized commodities. Your SCMS representative can provide you an estimated delivery date.

Q. Can SCMS procure locally in the country where my program is located?

A. Yes, SCMS can procure appropriate commodities from the local market. What we can procure depends on the commodity type (see explanation on quality requirement for pharmaceuticals), what is available on the local market, the quality of the product available and the cost compared to procuring from the international market. Contact your SCMS representative to discuss the option of local procurement.

Q. If I can't find a product in your e-catalog, what should I do?

A. If a product you require is not listed in our e-catalog, please contact SCMSInfo@pfscm.org. An SCMS representative will contact you to determine if we can supply it.

Q. If I want to receive deliveries over a period of time rather than in a single shipment, do I submit one request or multiple requests?

A. A single request is adequate, and we can then discuss with you an appropriate delivery pattern.

Price

Q. How do I obtain prices from SCMS?

A. SCMS establishes long-term supply contracts with major suppliers to obtain firm prices for the most frequently purchased commodities. Many of these prices are published by SCMS as they are negotiated. Send a request to SCMS and we will contact you to discuss your requirements. SCMS will then prepare a detailed priced quotation for your consideration. We charge our clients the cost of the commodity plus freight and delivery, in addition to a 15% surcharge or processing fee.

Q. What is the SCMS Pricing Policy?

A. We charge the cost of the commodity plus freight, delivery and a surcharge for processing the order. Commodities provided from a regional distribution center may have blended freight and commodity costs. In the spirit of transparency, from time to time we will report to our clients these service costs, including quality assurance surveillance, for your reference purposes only.

Q. Will SCMS prices be fixed and firm?

A. Yes, all commodity prices are fixed and firm. Freight and delivery costs may vary depending on whether we are able to consolidate shipments, and fluctuations in global oil prices may affect costs charged by the particular carrier. At the time of preparing your price quote, SCMS will provide you an estimated cost of the freight and delivery (including customs clearance). Once the delivery is finalized, we will charge you the actual cost of freight and delivery and provide you with the detail of these costs.

Q. How can I keep down the cost of shipping?

A. Working closely with our clients, we are now saving them hundreds of thousands of dollars by identifying commodities that can be shipped by sea freight or over land rather than by air. The resulting cost savings are considerable, often more than 80 percent for sea shipments and 50 percent by land.

Achieving results like these requires careful collaboration between SCMS staff and our clients to select appropriate commodities, consolidate shipments when possible and negotiate delivery dates. Those who plan orders well in advance by conducting and sharing forecasts and supply plans will be best positioned to benefit from savings in freight costs.

Q. How do I pay for the products my organization buys through SCMS?

A. Special arrangements exist for PEPFAR programs whereby payment is made directly to SCMS. For non-PEPFAR programs, SCMS requires payment in advance before we can confirm the order.

Q. Can I expect SCMS prices to be comparable to other procurement agents, for example will the Accelerated Access Initiative (AAI) prices for innovator ARVs be available via SCMS?

A. Yes, SCMS is fully competitive with suppliers of commodities of similar quality. AAI pricing is available through SCMS.

Q. Can SCMS help in preparing budget, forecast and supply plans to assess the costs of the commodities required?

A. Yes. In fact, this is our preferred method of operation. SCMS is more than just a source of supply or a procurement service agent. Our services extend beyond the supply of the product to provide technical assistance and advice to our clients. SCMS welcomes the opportunity to contribute to your planning and budgeting in order to achieve the best value and an uninterrupted supply of commodities for your program, whether or not you procure products from us. Please contact your local SCMS office to discuss your requirements. You may also contact us at our Washington-based project management office.
